

# Aldelo Polling Server

- Data Synchronization
- Monitor Trends
- Remote Updates
- Streamline Data Delivery

## Generate Mission Critical Data

Aldelo Polling Server eliminates paperwork by automatically transmitting daily sales from your restaurants to your headquarters via compressed Emails. Working together, Aldelo Polling Server and Aldelo For Restaurants Pro generate sales reports and mission critical statistics.

## Monitor Sales Trends and Performance

Aldelo Polling Server keeps you informed of your restaurants' performance, help you spot sales trends and enable you to compete more effectively. With all your data in one place, it is easy to see how your restaurants are doing at a glance.

## Update Remotely with Ease

With Aldelo Polling Server, you can also easily send menu changes, employee updates and inventory additions from your headquarters to each of your restaurants with the touch of a button. You can also easily schedule delayed store updates based on future dates. These capabilities truly allow your headquarters to tightly control each restaurant's operations with ease.

## Streamline Data Delivery

Let Aldelo Polling Server help you streamline your headquarters data delivery and site store data updates. Try our Aldelo Polling Server today to find out how much simpler your bi-directional data polling will be with our solution.
